

Term 1 Assignment

College Baseball Recruiting App for IOS

- This project will provide an option to high school athletes looking to play at the collegiate level using the software developed by Apple called XCode that uses the swift programming language.

Progress Summary

- Started the process of designing the first "view" of my app which includes a title, two buttons that will be used to redirect to different "pages" of the app, and added images relevant to the app description
- Implemented the use of Firebase to create a signup and login authentication server
- Created Athlete login and sign-up view
