

object of another class. An example of the nested class, *TimeCard* is defined as follows (see Fig. 13.3).

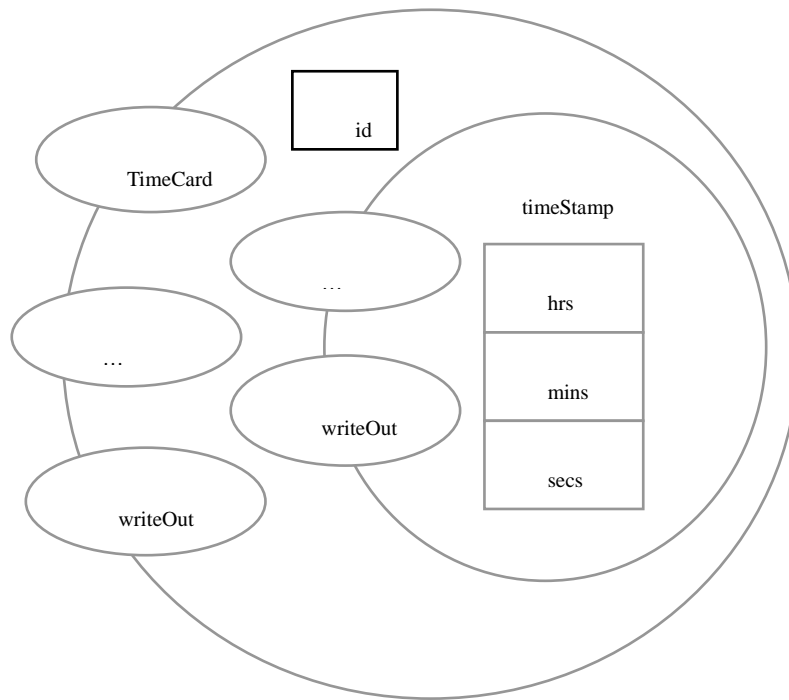

Fig. 13.3 The diagram of the nested class, *TimeCard*.

```
public class TimeCard
{
    private int id;
    private Time timeStamp;
    public TimeCard() // id: 0; timeStamp: 00:00:00
```
